EXAMINER'S AMENDMENT

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with George S. Bardmessenger on 03/13/06.

Please cancel claims 7,13,17,19,20,23.

Please replace the existing claims 21 and 22 with the amended claims [REDACTED] below:

21. (Currently Amended) A computing system comprising: a physical server having a single operating system Kernel; a plurality of isolated virtual computing environment running on the physical server, each virtual computing environment being functionally equivalent to a physical server, wherein the virtual computing environments do not require emulation of hardware resources and do not require dedicated memory; each virtual computing environment having plurality of objects associated with it and supported by the Kernel, with each object having a corresponding identifier, wherein at least some of the identifiers are the same for objects associated with different virtual computing environments, and wherein at least some objects are simultaneously associated with multiple virtual computing environment; wherein objects of different virtual computing environment are isolated from each other even when they have the same identifiers; and wherein the Kernel restricts access to objects using identifiers of one virtual computing environment from another virtual computing environment.

22. (Currently Amended) A method of operating a computing system comprising: starting a physical server having a single operating system Kernel; and initially a plurality of isolated virtual computing environment running on the physical server, each virtual computing environment being functionally equivalent to a physical server, each virtual computing environment having plurality of objects associated with it and supported by the Kernel, with each object having a corresponding identifier, wherein at least some of the identifiers are the same for objects associated with different virtual computing environments, and wherein at least some objects are simultaneously associated with multiple virtual computing environment; wherein objects of different virtual computing environment are isolated from each other even when they have the same identifiers; wherein the virtual computing environments do not require emulation of hardware resources and do not require dedicated memory, and wherein the Kernel restricts access to objects using identifiers of one virtual computing environment from another virtual computing environment.

REASON'S FOR ALLOWANCE

1. The claims 5,8,9,11,14,15,21,22 have been allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art references most closely resembling the applicant's claimed invention are Aziz et al (U.S. 6,779,016) and Huang et al (U.S. 2002/0091697).

First Aziz disclosed the web pages enable the customer to choose one of several VSF service plans, such as automatic growth and shrinkage of a VSF between a minimum and maximum number of elements, based on real time load. The customer have a control value that allows the customer to change parameters such as minimum number of computing elements in a particular tier such as web servers, or a time period in which VSF must have a minimal amount of server capacity. The parameters may be linked to billing software that would automatically adjust the customers bill rate and generate billing log file entries. Aziz failed to disclose "plurality of isolated virtual environment on the physical server, wherein the virtual computing environments do not require emulation of hardware resources and do not require dedicated memory" (claims 21,22).

Second Huang also failed to disclose, "plurality of isolated virtual environment on the physical server, wherein the virtual computing environments do not require emulation of hardware resources and do not require dedicated memory" (Claims 21,22).

Art Unit: 2145

In summary, the Examiner submits that there is no motivation to combine the aforementioned references; therefore, claims 5,8,9,11,14,15,21,22 have been deemed allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
